

## **P1 Homework Wall Feedback**

### **Pupil comments:**

- These were all fun
- We went exploring for 2 miles
- My favourite was running around.
- This was fun.
- I really enjoyed the homework wall – next time I would like more!
- I liked playing football.
- Loved exercising – made him feel happy. My child liked this homework approach.

### **Parent comments:**

- It was good to have consistent game based homework, especially bunny ears and counting that could be done on the move. Bunny ears and “make 10” were a good combination.
- I like the idea of having various activities to complete. My child enjoyed it too.
- Grid good and flexibility for time. Freedom to complete it.
- Feel that this is too much for P1 with homework we have already.
- Enjoyed being able to choose topics over the weeks.
- We have enjoyed doing the homework in this format. Some exercises involved (could involve) the whole family, e.g. Health and Wellbeing and Road Safety.
- Most of these things we do anyway.
- Will use these ideas from time to time. Not sure we did them all justice this time round. Rosie unenthusiastic about them when I called them homework. Though she’s always happy to read her book.
- Fun tasks to do at home. Feel the more structured usual homework is still required though.
- My child coped well with all of these activities and enjoyed a bit of an interesting approach to learning/homework.
- I like this – it adds flexibility and a sense of time management to the children’s home learning. The activities are fun and can be done with no prep.
- I like the new format and the activity that we could do with both children.
- I like the homework wall – feel like I know/understand what I should be doing! Thank you!
- Enjoyed this approach. Completed some tasks more than others.
- It’s quite difficult to know how you want these tasks to be recorded. Are we to do the Literacy tasks on a different piece of paper and hand that in?
- My child enjoyed the special homework and did enjoy the bunny ears and counting up and back from 100.
